\*Management Training - as outlined in LAC 48: Part V. 7707-7719

"As a part of meeting the managerial capacity requirements, all appropriate staff of existing public water systems shall attend a training session provided by the state, its contractors or the state recognized trainers for board members, council members/mayors/owners, etc. Management training for all board members/council members/mayors/owners of existing public water systems will be based on whether their water system has been issued an administrative order, and/or is on the significant non-complier's list and/or has had primary MCL violations during the past three years. The department will continue to encourage attendance on a voluntary basis at management training sessions by board members/council members/mayors/owners of other public water systems. Training sessions shall be provided periodically and appropriate parties as noted above will have the opportunity to attend one of the scheduled sessions within six months after the system has been notified that it is being evaluated for technical, managerial, and financial capacity."
