

IMPORTANT NOTICE

To All Occupants and Residents of

_____ (system name)

The _____ (system name) will be conducting leak test in the sanitary sewer systems by blowing smoke into these pipes during the coming weeks. This smoke will reveal sources of sewer odors in your neighborhood as well as places where some and other surface waters are entering the sanitary system.

A photograph will be taken of leaks occurring in the system. In order to do so, our representatives may have to enter your yard, depending on where the leaks are located. At no time will it be necessary for our representatives to enter your home. We would appreciate your cooperation in allowing the photographer to take pictures.

A special, non-toxic smoke will be used in these tests. This smoke is manufactured for this purpose, leaves no residuals or stains and has no effects on plant or animal life. The smoke has a distinctive, but not unpleasant, odor. Visibility and odor last only a few minutes, where there is adequate ventilation.

Because the plumbing appliances in your house or building are connected to the sanitary sewer system, some of this smoke may enter your house if the:

- ◆ Vents connected to your building's sewer pipes are inadequate, defective or improperly installed.
- ◆ Traps under sinks, tubs, basins, showers and other drains are dry, defective, improperly installed or missing.
- ◆ Pipes, connections and seals of the wastewater drain system in and under your building are damaged, defective, have plugs missing or are improperly installed.

All residents are advised that if traces of this smoke or its odor enter your house or building, it is an indication that gases and odors from the sewer may also enter. These can be both unpleasant and dangerous as well as a health hazard to the occupants. Location, identification and correction of the source of smoke that enters your house is urgently advised.

While the _____ (system name) will render all possible cooperation, **the correction of any defects in the pipes and sewer lines on private property is the responsibility of the owner. The services of a professional plumber are advised.**

If you have any questions or desire more information, Please contact the

_____ (system name)
